5.2 Average class size (ACS) per discipline (as noted on Staffing Ratio Scale) is to be determined by Division Dean (using “rule of thumb” figure set by division experience).

5.3 This figure (ACS) is established as a base norm to objectively establish a faculty position formula per discipline. The figure itself does not represent one particular course, but rather is a discipline average.

5.4 The faculty position formula is as follows:

$$\text{ACS} \times \text{Full Load} = \text{CHP} = \text{one faculty position}$$

Example: Religion
 $30 \times 15 = 450 \text{ CHP}$
 450 CHP determines one faculty position

5.5 This formula, establishing a scale to identify one faculty position, is then used as the base norm for faculty staffing decisions per discipline.

5.6 As trends emerge, division recommendations are to be made. Division recommendations regarding faculty positions are to be based on a two-year period.
